Successful businesses use data and models to make better decisions and gain competitive advantage. Vast amounts of data on customers, suppliers, operations, and financial transactions are collected from a variety of sources, often managed in diverse systems, by multiple stakeholders. Transforming this data into insights that can enhance decision-making is a key challenge for businesses of every size, across all industries. Companies are looking for skilled professionals who can solve key operational and strategic business questions using data, statistics, and machine learning.

The **MASTER OF SCIENCE IN BUSINESS ANALYTICS (MSBA)** at the Rady School we will provide you with the required skills to succeed in data-rich business environments. The program offers rigorous, hands-on training that will prepare you to use data and analytics to identify business opportunities, generate insights, and create value for both customers and companies. The program can be completed as a full-time student in as little as 11 months. Students enrolled in the flexweekend program can complete the degree in between 12 and 24 months depending on their schedule.

**WHY ATTEND?**
- Experience the full lifecycle of a business analytics project
- Hands-on involvement with Rady School industry partners
- Team based consulting project under faculty supervision
- Sample Capstone Companies: Cisco, Mazda, Hewlett Packard, IBM, ThermoFisher, PetCo, Certona, and Aira.
